

PYTHON FOR FONTS

What is Python?

WE NEED A REASON RIGHT?

Why should you use it?

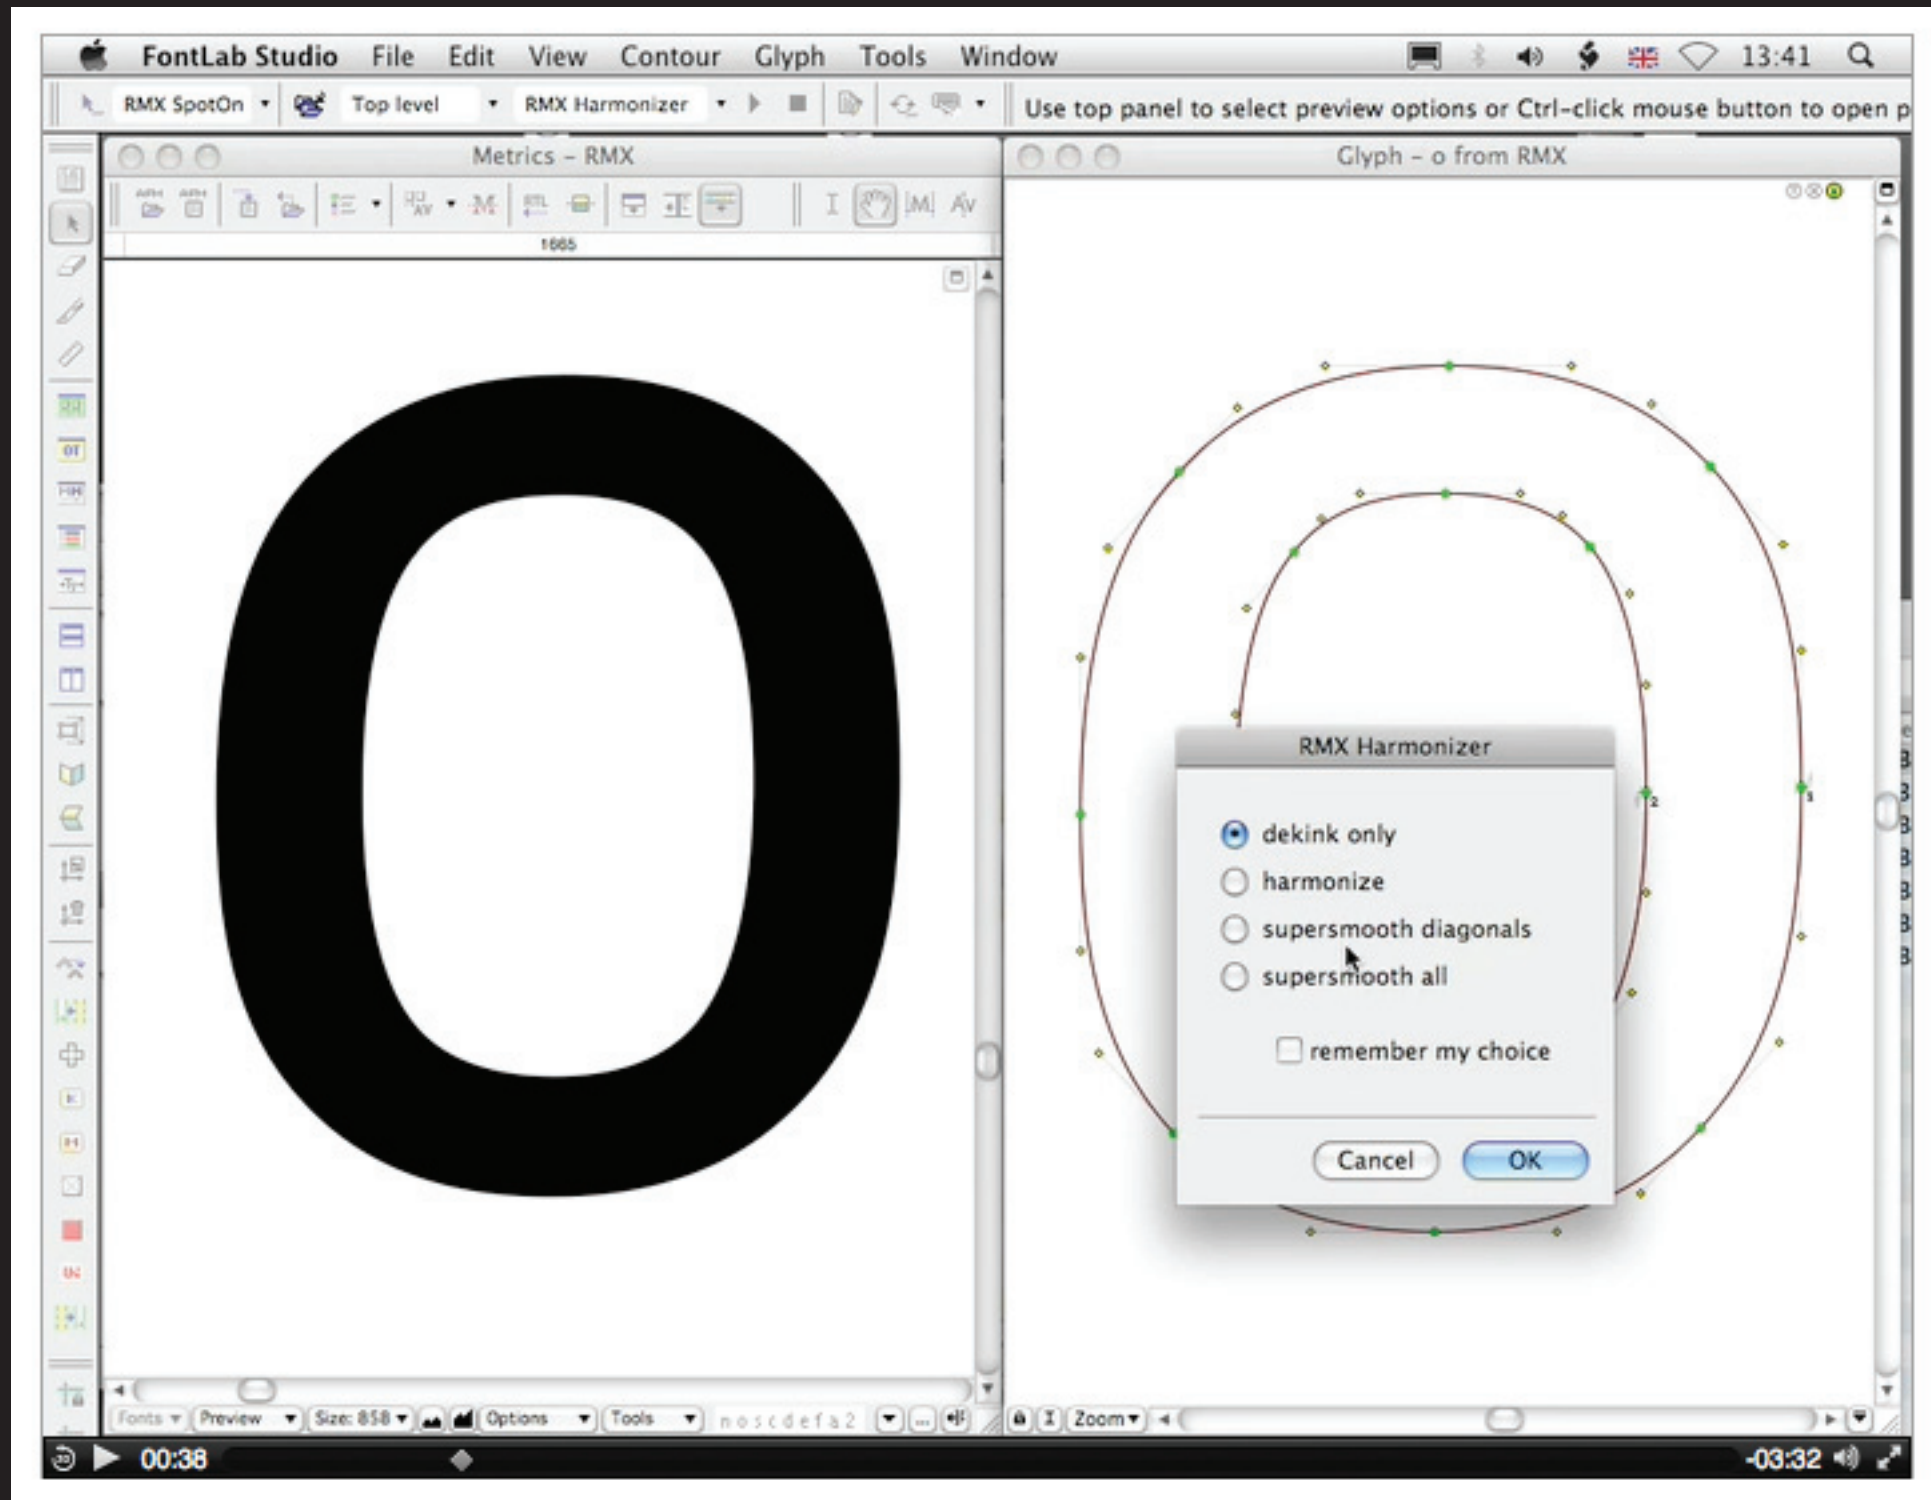

It will save you time,
as well as your sanity.

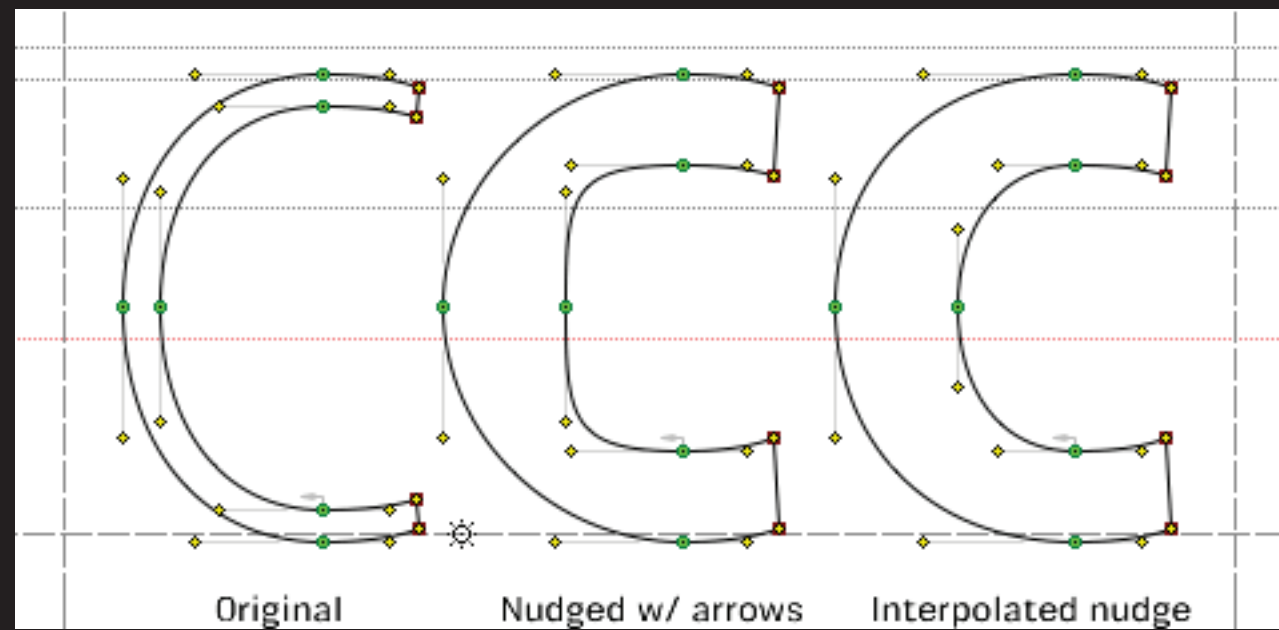

It can give you an edge
on other designers.

BUT I'M A DESIGNER NOT A DEVELOPER

Do I really have to learn
how to code?

FONT REMIX TOOLS: WWW.REMIX-TOOLS.COM

AUTOPSY: WWW.YANONE.DE/TYPEDESIGN/CODE/AUTOPSY/

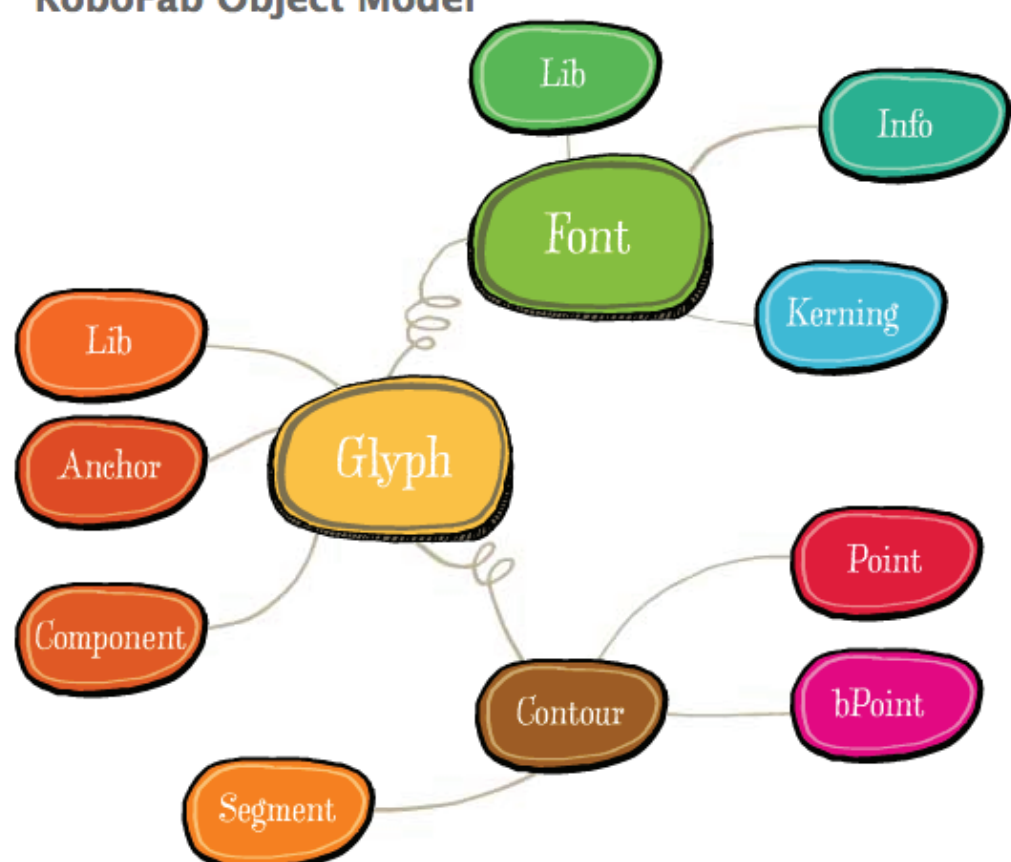

THOSE ARE REALLY HELPFUL, BUT WE CAN DO EVEN BETTER.

Where to get started on
your own scripts.
